Network Automation Project This project automates DHCP and OSPF configuration on Cisco networking devices.

Prerequisites - Python 3.x installed - Pip package manager installed

Installation :
Clone the repository: ```bash git clone https://github.com/your-username/network-automation.git

- Change into the project directory:
    cd network-automation
- Install dependencies:
    pip install -r requirements.txt

Usage:
Run the following command to configure both DHCP and OSPF on a Cisco device:
python network_automation.py

Configuration:
Modify the script files (dhcp_automation.py and ospf_automation.py) with your device details and configurations.

Contributing:
Contributions are welcome! Please fork the repository and create a pull request with your changes.
